

OPW 106 Identification Marker

OPW 106 Identification Markers are used to identify the grade product stored in underground tanks. These markers are easily set in concrete, and once set, are permanent. The letter plate is recessed into the face of the base and fastened with two screws. The raised letters are easy to change when the product is changed. Letters available are P, R, U, SU, X, DL. Numbers 1, 2, 3, 4.

OPW 107 Nameplate Holder

OPW 107 Nameplate Holders, when secured to storage tank fill pipes, provide a method to permanently identify the product in the tanks.

Spill Container Product Identification Tags

OPW Color-Coded Spill Container Tags positively and conspicuously identify tanks, preventing costly and dangerous product drop mistakes. Simply "peel and stick" the high-visibility color inserts into the special recesses cast into the spill container cover.

Matching bucket tags, supplied with tie wraps, are permanently affixed inside the spill container to help prevent covers from getting switched.

Materials

Base and anchor shank: Aluminum

Letter Plate: Cast aluminum

Screws (2): Brass
