

320 FOOT VALVE EXTRACTOR

The 320 foot valve extractor is designed for use with the 150 and 151 1/2" foot valves. This 20 lb. extractor valve provides a means to remove foot valves easily from underground storage tanks for cleaning or servicing. The 320 foot valve extractor is gasket sealed to prevent loss of prime caused by air being sucked in through the top fitting.

Model	Size		A		B
