

VAPOR SWIVEL ADAPTERS

The vapor swivel adapter helps prevent leaks caused by constant delivery elbow movement on the riser adapter. The top section rotates during normal deliveries, preventing the bottom section from loosening on the riser pipe which could cause a vapor or product leak around the adapter. It's poppet design seals off the vapor path when not coupled.

HIGHLIGHTS

- Adds approximately 4" to riser height to fit under most existing fill and vapor manway covers.
- Swivels on two rows of corrosion-resistant chromium steel ball bearings for long life in high volume stations.
- All vapor seals are fluorocarbon and inert in motor fuels.
- Stainless steel models provide additional fuel compatibility and are CARB Phase I EVR approved under executive order VR-101.
- Available in packages including vapor and fill adapter.
- Available in kits including riser, cap, and swivel adapter.
